If You are Concerned

In the making or selling of lumber, there is many a laugh awaiting you in

Resawed Fables

By Douglas Malloch

The philosophy and wit of the lumber business are here contained. If a lumberman's library consisted of but one book, this should be the book.

Chapin's Lumber Reckoner

Reduces all fractional sizes of dimension lumber to board measure, advancing by the quarter inch from

1x1 to 12x12 inches square, and from 1 to 30 feet in length. Also scantling and square timber, advancing 1 inch in regular order from 2x2 to 30x30 inches square to 30 feet in length. Saw logs are reduced to board measure. The tables contain more than 200,000 figures and are absolutely correct.

Saw mill men, lumbermen, contractors, architects, purchasing agents, auditors, bookkeepers, in fact any one connected with the lumber business will find the Reckoner valuable in the saving of time, labor and errors.

The book contains 171 pages printed on strong white paper and comes in cloth

and morocco binding. It can be easily carried in the pocket, as the size is 4x7 inches. Price, bound in morocco, lap and pocket, \$2; in cloth, \$2, postpaid.

Climax Tally Book

The most convenient and practical hardwood tally book.

Note the hand strap feature.

The "Climax" was designed by a practical hardwood inspector whose long experience had shown him what is needed, both in arrangement of the pages and for convenience of handling.

It is substantially bound in sheep, with stiff covers and round corners. The hand-strap (see illustration) are of heavy leather, riveted high grade.

The size of the book closed is 4 1/2 x 6 1/2 inches and it has 110 pages.

Price, 1 copy, 75 cents; 6 copies, \$4;
12 copies, \$7.50.

AMERICAN LUMBERMAN

437 South Dearborn Street.

The engraving shows the hand strap and the way to hold the book, if it is raining or snowing. The book can be closed between the pages if the hand can be dropped.
